Walk lasted between 12:00 and 14:19. Tournament Park was closed.

We had a great walk and it started off with a bang as we saw 6 American White Pelicans circling around overhead from our vantage point near the beginning of the walk on California Blvd. They were the only zero-probability sightings we had. Another couple of nice birds were a Say's Phoebe and a Hermit Thrush. We beat the predicted number of 23.6 species by 3.4 birds. The record for the week was 32, so we didn't threaten that. Rock Pigeons are making a comeback on campus as we saw 17 this week and 8 last week.
