Walk lasted between 12:00 and 13:58. Tournament Park was open.

When I was filling out the table above, I noticed the list was very similar to last week's list. But, we did not see the White-breasted Nuthatch this time. But we did get the same number of species as last week, 25, which was 0.7 short of the prediction but 3 above the median. 31 was the maximum for this week. Good walk.
