Walk lasted between 12:00 and 14:06. Tournament Park still closed.

This was a record-setting walk! The previous record for this week was 30 and we got 33 species! This is the third-highest total of all time. There was a 35 and a 37 and four 32's, but never a 33. Now there is one. See [http://birdwalks.caltech.edu/bird\\_data/species\\_time.html](http://birdwalks.caltech.edu/bird_data/species_time.html)

The Sparrow, sp. was seen in the backyard of a house over the fence in the maintenance yard. It was definitely not a House Sparrow, so it got added to the list. It was probably a Lincoln's, but we weren't sure, so I went with species.
