Walk lasted between 12:00 and 13:56. Tournament Park was open.

We welcomed back Fiona Tindall, who has walked 24 times overall but not any since 2021. It was good to have her join in and maybe she brought us some luck. We saw a Western Tanager for the first time in a long time, and the Red-naped Sapsucker was back in Tournament Park. We observed 26 species, which was 2.3 above the prediction but well below the maximum for the week of 35. We are in the period of big numbers. In two weeks, the all-time record of 37 was set. Next week's record is 31. It's a good time to join a walk, but the weather on Tuesday's lately has not been very good, not is it likely to be good this week. I'll let people know if the day is going to be switched.
