Walk lasted between 12:00 and 14:01. Tournament Park was open.

Wow, what a walk! We had 35 species, which beat the record for the week of 31 and came in tied for second all-time. The all-time record is 37, which is coming up next week. We were helped a lot by the appearance of Darren Dowell, who only walked the Tournament Park leg, but that was where we saw the Yellow-bellied Sapsucker, which is a new bird for the Caltech list! There was a Red-naped Sapsucker there too, which only Darren saw, but he said it briefly interacted with the immature female Yellow-bellied Sapsucker, which several of us were able to see. Fantastic walk!
