Walk lasted between 12:00 and 13:54. Tournament Park was open.

It was a bit windy and we think that held the numbers down. Nonetheless, we got within 0.9 species of hitting the prediction. And we beat the median by 2, so not bad. Our highlight bird was a female Western Tanager. The lowlights were the two species with 100% probability that we didn't see: Bushtit and Northern Mockingbird.
