Walk lasted between 12:00 and 14:20.

Wow, what a walk! We recorded 30 species and you know what I always say, if you see 30 or more, it's a great walk. We were just one short of the record for the week and well above the predicted 22.6. We were lucky with a number of zero probables, but we could have tied the record if we'd seen a very probable Band-tailed Pigeon. But those are the bird watching breaks. We'll take it.
