Walk lasted between 12:00 and 13:49.

We had a better than predicted walk total, barely. We observed 21 species and the prediction was 20.4. So, the prediction was very good. We had a really nice view of a Cooper's Hawk perched on a branch of a tree on Arden Rd. And we had 7 Bewick's Wrens. Ellen located a batch of 4 together in Tournament Park and then we added 3 more along the way. Good weather; pleasant walk.
