Walk lasted between 12:00 and 13:46

We had a good group of 8 walkers and we observed 22 species, 2 above the prediction. The family of 5 oak titmice were in a tree just south of the IPAC building. We saw adults feeding juveniles. The most interesting observation by some was a White-throated Swift attacking a Northern Rough-winged Swallow. Apparently, contact was made and the swallow fell out of the sky but regained control before hitting the ground. You never know what you are going to see on one of these walks!
