What a great walk! We set a new record for week 31 with 20 species, 2 above the previous mark. We had a great experience with two Hutton's Vireos down on Arden Road. Viveca played their song and got a response and they came over to us to seal the identification deal. We did see some zero probability birds to lift our numbers up, but we didn't see an Anna's Hummingbird at 0.75 probable, which really surprised us. But, we'll take it!
