Walk lasted between 12:00 and 14:07

We observed 19 species, 2 below the prediction, but we had a couple of outstanding birds: Western Tanager and Red-naped Sapsucker. The sapsucker seems to have found a new tree. It's right by the driveway to 1240 Arden Rd. We see lots of horizontal rows of holes, indicative of a sapsucker, and I saw the sapsucker itself. In the same tree was a Western Tanager. So, wow, good day.
