Walk lasted between 12:00 and 14:08

We had a very good walk. We had 22 species, 2.7 better than predicted and only 2 short of the record for the week. It could have been better as we did not observe the 100% probable Lesser Goldfinch. On the other hand, it could have been worse as we bagged several 0% probable birds: Cassin's Kingbird, Horned Lark, and Mitred Parakeet. And we saw 7 American Pipits and the first Cedar Waxwing in a long time. So, this was a very good walk indeed.
