Walk lasted between 12:00 and 14:02. Tournament Park was open.

We had a spectacular walk, and not just because we tied the record for the week with 27 species observed; we also saw a Red-naped Sapsucker in Tournament Park and followed that up with 10 American Robins in the area just south of the IPAC building on Wilson. The red-naped was in a tree just north of the sapsucker tree and I think everyone got a good view. Great bird. Great walk!
