Walk lasted between 12:00 and 14:14

We had another good walk with a spectacular sighting. We observed 23 species, 1.5 above the prediction, but well sort of the record for the week of 30. The spectacular sighting was of a Great Egret, flying west along Del Mar. We were in the right place at the right time to get that one. Otherwise, pretty normal. The highest probability bird we missed was the Northern Mockingbird at 75% probable. Overall, not half bad.
